CHEMETAL

Chemetal is a great and relatively easy way to bring the beauty, luxury and energy of metal to interior design spaces.

This look book features inspirational examples of how design professionals use Chemetal.

#927 Light Stainless Steel Aluminum (arches)

Let's crank some metal.

Chemetal is a massive collection of over 100 metal designs for interior spaces. It's quite possibly the best way to bring the luxury and energy of metal to interior spaces. We make many designs in-house and source others from top producers in the USA, Germany and Japan.

A second generation family-owned company that's been in business for over 50 years, Chemetal is located in a 72,000 sqft. metal design factory in western Massachusetts. We patina, brush and antique metal every day. We create metal designs with lasers, CNCs, robotic arms and most importantly, a production team with years of decorative metal experience.

Since Chemetal is mostly made from aluminum, brass, or HPL metals (metal foil atop laminate backer) it's easier to fabricate. These metals are lighter, softer and easier to cut and bend in a woodworking shop, which usually makes fabrication more affordable. Plus, we can do many elements of off-site custom fabrication at Chemetal.

Finally, Chemetal is a company that cares about getting it right. From customer service and sales, to production and shipping, we want to do a great job. It's part of our belief that Chemetal is the best way to bring the beauty of metal into interior design spaces.

Classic Metals

Classic Metals 700-900 Series

For those with a finer appreciation of the classics.

Classic Metals are Chemetal's most popular metals, with good reason. Chemetal has the largest collection of these anodized HPL metals that you'll find anywhere. Aluminum. Stainless. Brass. Black. Copper. Bronze. These materials are design workhorses, ideal for inlays, cut-to-size, strips, signage, panels and anywhere you want the modern, luxurious and energetic look of real metal. Classic Metals are available in 3 Series, each with its own advantages.

700 Series HPL Classics

Benefits:

- Metal foil bonded to laminate backer.
- European quality, made in Germany.
- HPL laminate backer offers increased impact resistance.
- Easy to fabricate/apply like laminate.
- Budget brushed/stainless aluminum options.

800 Series Traditional Classics

Benefits:

- Impressive depth, rich design.
- Contributes to LEED.
- Material without backer can be bent or adhered to substrate for clean edge.
- 2 foot width, 8' and 10' length plus custom lengths and sizes.

900 Series Anodized Classics

Benefits:

- Affordable and durable anodized aluminum, made in USA.
- Can be bent or adhered directly to substrate for clean edge.
- Aluminum is a soft metal, fabricated with woodworking equipment.
- Contributes to LEED, Red-List Free
- Available with low pressure back or find HPL match in 700 Series.
- 4 foot width, 8' and 10' length plus custom lengths and sizes.

Antiqued and Darkened Metals

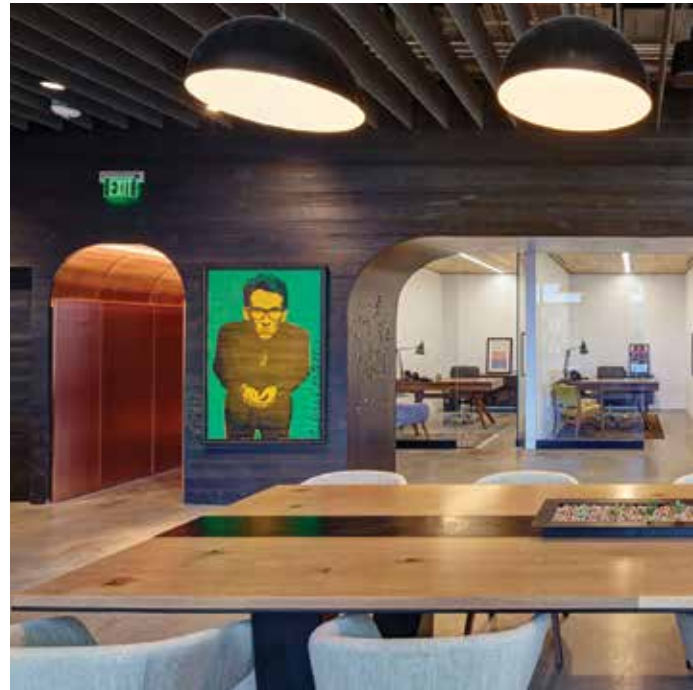

Some of our most popular designs in aluminum, brass and copper.
